EDUCATION

Western University
Bachelor of Science, Honours Specialization in Computer Science
GPA: 3.80/4.00
Dean's Honour List 2023-2024, 2024-2025

London, ON
Sep. 2023 { April 2028

EXPERIENCE

Automation Analyst at RBC May 2026 - August 2026
Toronto, ON

- Developed and maintained automated end-to-end UI test suites for consumer banking credit card offer flows using Playwright and TypeScript, improving test coverage, validating customer-facing functionality, and supporting reliable releases across web applications.
- Collaborated with QA analysts and developers to identify and validate UI defects, while implementing automated regression testing workflows and scalable test scripts to improve software quality and reduce manual testing effort.

Software Developer & QA Intern at Trojan Technologies May 2025 - May 2026
London, ON

- Designed and implemented a C# test automation framework for hardware scripting, integrating communication protocols to enhance product validation and cut initial testing time by **60%**
- Utilized Docker to containerize and execute hardware test workflows, ensuring consistent, isolated environments for automated validation
- Optimized CI workflows using Jenkins to include code linting, build verification, and test coverage tracking, reducing regression issues and deployment downtime

Web Developer Intern at Ski Education Network (Project-Based Contract) January 2026 - March 2026
Toronto, ON

- Developed new business section on website using React, HTML/CSS/JS, ensuring responsive design
- Configured routing and navigation with React Router to improve user flow

Full-stack Developer at Western Developer's Society September 2024 - April 2025
London, ON

- Developed a council management application to automate speaking order, attendance tracking, and voting processes for the Undergraduate Engineering Society, enhancing meeting efficiency
- Built a Flask REST API integrated with a relational database to securely handle attendance tracking, voting workflows, and speaking order management

PROJECTS

Pokemon Nuzlocke Tracker | *Python, FastAPI, React, PostgreSQL, TypeScript, OAuth* August 2025 – December 2025

- Developed a full-stack web application for tracking Pokémon Nuzlocke challenge runs using a FastAPI (Python) backend and React + TypeScript frontend, enabling users to manage multiple save files, track team progression, and monitor route and gym completion across main-series Pokémon games, attracting **1,000+** users and generating **10,000+** page views.
- Implemented a secure JWT-based authentication system with Google OAuth integration, including token issuance, refresh logic, and protected route middleware using the HTTPBearer security scheme.

CareLink (2nd Place, Spark 2026 Hackathon) | *Next.js, React, Tailwind CSS, IndexedDB, CouchDB, Groq API* January 2026

- Designed and built an offline-first Progressive Web Application to track patient referrals in rural healthcare settings with unreliable internet connectivity.
- Implemented local-first data storage using IndexedDB with automatic synchronization to CouchDB, enabling full offline functionality and seamless multi-device sync.
- Integrated OCR-based document scanning using Groq API to extract structured patient data from photographed paper referrals, reducing manual data entry.

AI + IoT Agricultural Risk Intelligence | *Python, Scikit-learn, Pandas, NumPy, Streamlit, OpenAI SDK* January 2026

- Designed and implemented a hybrid environmental intelligence platform with real-time MQTT data pipelines fusing satellite data and IoT sensor telemetry to compute live Fire Weather Index (FWI) and farm risk indicators.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, C#, SQL (Postgres), JavaScript, TypeScript, HTML/CSS

Developer Tools: Jira, Jenkins, Linux, Git, Postman, Kubernetes, AWS, Google Cloud, Power BI, Selenium, Confluence, Agile, Docker, Microsoft Tools

Libraries/Frameworks: React, Node.js, Playwright, FastAPI, Flask, MongoDB, Numpy, Pandas, Matplotlib, Scikit, xUnit, BeautifulSoup, FluentModbus
