Education

Western University – London, ON
Bachelor of Science, Honours Specialization in Computer Science
Dean's Honour List 2023–2024, 2024–2025

Expected April 2028
GPA: 3.70 / 4.00

Experience

Automation Engineer Intern, Royal Bank of Canada (RBC) – Toronto, ON May 2026 – August 2026

- Built an automated API validation suite covering authentication, third-party eligibility verification, and credit decisioning endpoints for RBC's consumer banking platform
- Engineered an AI test generation pipeline integrating MCP server connections to autonomously parse Jira user stories, generate comprehensive test cases, and publish documentation to Confluence, reducing manual QA labour by a projected **70%**
- Extended an enterprise Playwright/TypeScript E2E suite with over **20** critical-path test scenarios encompassing **100+** individual validations across consumer credit card offer flows

Software Developer and QA Intern, Trojan Technologies – London, ON May 2025 – May 2026

- Cut initial hardware testing time by **60%** with a C# automation framework integrating Modbus RTU, RS232/RS485, TCP, and MQTT device protocols for product validation
- Built and administered Jenkins CI/CD pipelines on a Windows runner, gating merges on xUnit test runs, linting, and build verification with **80%** coverage tracked through Coverlet
- Automated infrastructure provisioning through the Proxmox VE API, cloning LXC containers and managing a pool of test environments that Jenkins pipelines allocated per build

Projects

Pokémon Nuzlocke Tracker | Python, FastAPI, React, TypeScript, Supabase, IndexedDB, OAuth nuzlify.com

- Built a full-stack Nuzlocke run tracker that has drawn **1,500+** users and **15,000+** page views, letting players manage save files and track team, route, and gym progress across the main-series games
- Designed JWT session handling for Google OAuth login, including token issuance, refresh rotation, and auth guards on protected routes
- Engineered offline-first functionality using IndexedDB and localStorage, allowing uninterrupted game tracking with automatic sync on reconnect

CareLink | Next.js, React, Tailwind CSS, IndexedDB, CouchDB, Groq API
